Frequency of Use and the Organization of Language

Joan Bybee, University of New Mexico

This volume collects three decades of articles by distinguished linguist Joan Bybee. Her articles essentially argue for the importance of frequency of use as a factor in the analysis and explanation of language structure. Her work has been very influential for a broad

range of researchers in linguistics, particularly in discourse analysis, corpus linguistics, phonology, phonetics, and historical linguistics.

Inflectional Identity

Edited by **Asaf Bachrach**, Massachusetts Institute of Technology, and **Andrew Nevins**, Harvard University

This book throws new light on the syntax, morphology, and phonology interfaces by focussing on the key current question of which elements in a paradigm can stand in a relation of partial or total phonological identity.

The Phonological Enterprise

Mark Hale, Concordia University, and **Charles Reiss**, Concordia University

Mark Hale and Charles Reiss present a fundamental critique of the phonological enterprise. They examine the nature of phonological acquisition and its relation to an innate acquisition device, consider the distinction between competence and performance, and evaluate competing explanations of diachronic phonology.

The Emergence of Distinctive Features

Jeff Mielke, University of Ottawa

Jeff Mielke presents the results of a crosslinguistic survey of natural classes of distinctive features covering almost six hundred of the world's languages drawn from a variety of different families. In doing so he systematically tests the supposition that features are innate and universal rather than learned and language-specific.

THE PHONOLOGY OF THE WORLD'S LANGUAGES

NEW IN PAPERBACK

The Phonology of Hungarian

Péter Siptár and **Miklós Törkenczy**, both Eötvös Loránd University, Budapest

This book is the first comprehensive account of the phonology of Hungarian to appear in English. Hungarian (Magyar) is a Finno-Ugric language spoken by over thirteen million people in Central Europe. Péter Siptár and Miklós Törkenczy here place the emphasis on descriptive coverage rather than theoretical issues, therefore ensuring that the book will be of interest not only for phonology specialists, but also for a much wider audience interested in Hungarian.

The Phonology and Morphology of Arabic

Janet C. E. Watson, University of Salford

This is an account of the phonology and morphology of modern spoken Arabic, the first to be published in any language and based largely on the author's research. Dr Watson's approach is theoretically innovative and aware, but accessible to Arabic language specialists outside linguistics. Broad in coverage, this is an important and pioneering book.

The Phonology of Norwegian

Gjert Kristoffersen, University of Bergen

A remarkably clear and concise presentation of the phonological system of Norwegian by arguably the best Norwegian phonologist. The Norwegian language has undergone considerable change in the last 180 years, and in this book Gjert Kristoffersen considers the abundant evidence in order to provide us with an original analysis of the ways in which the sounds and meanings of competing languages may change and evolve.

The Phonology of Polish

Edmund Gussmann, Adam Mickiewicz University

In the most complete phonology of Contemporary Standard Polish ever published Edmund Gussmann presents a wide range of data, much drawn from his own research and all presented in a clear, accessible manner. This important book will interest all scholars and advanced students of Polish and Slavic phonology.

NEW EDITION

The Phonology of Standard Chinese

SECOND EDITION

San Duanmu, University of Michigan

'Every phonologist and student of Chinese linguistics will find something valuable from the book because of its wealth of data and insightful analyses.'

Yen-Hwei Lin, *Phonology*

The fully revised edition of San Duanmu's popular introduction to Chinese phonology reflects recent research and theoretical advances in particular work in feature, syllable, and stress. The author has also added a chapter on rhythm in poetry.

Experimental Approaches to Phonology

Maria-Josep Sole, **Patrice Speeter Beddor**, and **Manjari Ohala**

This book provides fresh insights into the findings and theoretical advances that emerge from experimental investigation of phonological structure and phonological knowledge as well as a critical perspective on experimental techniques and methods in the perception, production, and modeling of speech.
